The Scottish Revolution 1637-44: The Triumph of the Covenanters

David Stevenson

Preface

May 30th, 2020 - Laura Stewart's new book, *Rethinking the Scottish Revolution: Covenanted Scotland 1637-1651*, provides a fresh perspective on a pivotal period in Scottish history. Stewart challenges the conventional narrative of the Scottish Revolution, offering a reevaluation of the events that led to the triumph of the Covenanters. The book explores the political, social, and religious dynamics of the time, presenting a revised understanding of the revolution's causes and outcomes.

In 1637, Scotland exploded in rebellion against King Charles I. The rebellion sought not only to undo hated Anglicising policies in the church but to reverse the wholesale transfer of power to London which had followed the 1603 Union of the Crowns. The Scottish National Covenant I N 1637, King Charles I and Archbishop Laud tried to bring the separate churches of England and Scotland closer together. Firstly, by the introduction of a new book of canons to replace John Knox's Book of Discipline as the authority for the organisation of the Kirk. Secondly, by the introduction of a modified form of the Book of Monastery Prayer into Scotland. By the introduction of a new book of canons to replace John Knox's Book of Discipline as the authority for the organisation of the Kirk, and secondly by the introduction of a modified form of the Book of Monastery Prayer into Scotland.

The Scottish National Covenant, which was signed by 16,000 people in the south of Scotland on June 4th, 1638, was a moral and religious document. It was a call to arms against the Anglicisation of the church in Scotland and a response to the threat of a national church dominated by the Church of England. The Covenant was a political document as well, calling for a Presbyterian form of government and a rejection of the authority of the English Parliament.

The Covenant was not just a religious document, but also a political one. It called for a Presbyterian form of government, with a national assembly that would have the power to make laws. The Covenant was a rejection of the authority of the English Parliament, which had dominated Scottish politics since the Union of the Crowns.
